

**You can own a complete collection of our hydrogen reports and analysis for only \$495. Our Hydrogen CD includes all of the titles listed below.**

This CD also includes the complete collection of our GenH<sub>2</sub>/Energy Initiatives columns from 2005 – 2008.

These columns spotlight the most innovative developments in the hydrogen industry.

## The Hydrogen CD

**CryoGas International covers hydrogen like no other publication or news source.**

As the leading business journal of the industrial gas industry — the primary producer of hydrogen today — we report from the front lines. We are the leading source of information on US hydrogen markets, including refinery and merchant hydrogen, and on hydrogen applications and technology worldwide. *CryoGas International* also carries news and reports on emerging hydrogen markets in every issue of our magazine. In our pages, leading companies and consultants introduce hydrogen process technologies and infrastructure developments that support new stationary and transportation hydrogen fuel developments.
